CNC Finger Bits

Excellent performance and long life make this CNC finger bit a great choice for stone fabricators.

- Very aggressive
- Fast and smooth cutting
- Soft bond wears evenly
- Great for soft, medium and hard granites
- Made in Korea

Router Bits

Made of high quality diamonds with sintered technology, these router bits work exceptionally well on natural stones. They can fit on any popular routers on N. American market. Other shapes and positions are available upon request.

- Special matrix for exceptionally fast cutting and long life
- High concentration of top grade diamonds
- Premium quality bearing, nuts and bolts
- 8mm and 10mm bolts included
- Wet use only

Standard Resin-Bond Diamond Polishing Pads - Wet

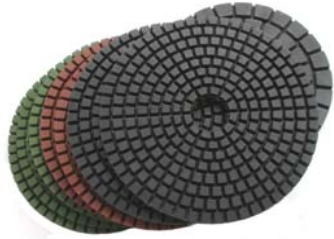

The improved matrix makes these resin-bond diamond polishing pads flexible and more aggressive. They work well on granite, marble and concrete. Tests and feedbacks from customers indicate that these pads are on par with or better than some of the leading brands on the market.

We offer two versions of the wet pads – standard and supreme.

Electric Angle Grinder

Makita variable speed industrial grinder is a powerful and versatile tool for stone fabrication and construction.

- 5 stage variable speed control
- Super Joint System (SJS) helps prevent gear damage
- Improved 12 AMP motor design for increased output power
- Labyrinth construction seals and protects the motor and bearings from dust and debris

Product No.	Description	Price
P060-G9565CV	5" Makita Industrial Variable Speed Angle Grinder	\$182.00

Stone Cutting Saw - Wet

The AWS-125 Wet Stone Cutter is designed for use in the stone, tile and glass industry.

- Powerful motor
- Built in GFCI (Ground Fault Circuit Interrupter)
- Side handle for more stability and control
- Accepts curve cutting blades

Electric Wet Polisher

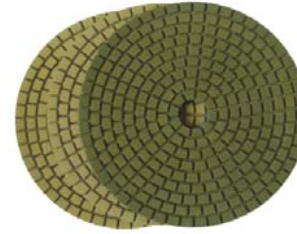

As a very popular electric wet polisher in stone fabricating industry, it provides portability and convenience when needed.

- High power-to-weight ratio (1.72) for reduced operator fatigue
- Soft-Start feature for smooth start-up; variable speed
- Housing cover protects the industrial die cast aluminum gear housing
- 3 holes at the spindle top evenly spread water to the pad and prevents the pad from clogging
- Overload switch to protect armature failure
- Includes a ground fault circuit interrupter (GFCI) plug
- Pre-setting dial (2,000 – 4,000 RPM) for optimum rotating speed
